

IT'S SHOWTIME

Prospect theater has not stopped since *Pyramus and Thisbe*, and we have been working hard for weeks and are almost ready to go live this Friday and Saturday night. This next production is *Too Much Light Makes the Baby Go Blind (TML)*. This awesome experience allowed us to interpret 30 selected short plays and interpret them in a virtual world. *TML* opened in 1988 and still is playing today as the longest-running show in Chicago history. It is an ensemble experiment in presenting 30 plays in 60 minutes. Each play is performed in random order with an interactive audience. This is where you come in. We need people to see the show and to text in to the hotline requesting the scenes and the order in which they want them. But the show will stop at 60 minutes. So, if we have a small audience or there is no interaction, the show may not finish. There will be a collection of comic, tragic, political, and abstract plays and the order will be different both nights. So please spread the word!

DONATIONS RESPECTFULLY REQUESTED

We are not asking for ticket money from any of our guests. However, we are seeking any financial support families feel that they can share during these very difficult times for all to cover the streaming, rights, and script costs. If you can't, just showing up means the world to the program. To make a donation, please go to <https://tickets.d214.org/tickets/125> and select one ticket. There will be a \$0 "charge" for the show; however, you can select the amount of your generous donation that you would like to make. Again, help us share this message as well!

Additionally, next week we originally had a drive-in radio show experience planned (which we would have charged for tickets), but out of safety we will stream that production on the 10th! Again, there will be no cost for either show that we will provide for the community. More information about the Radio Plays and Too Much Light can be found at www.phsfinearts.com. There is such talent and exciting opportunities for our students. Now, we just need the audiences.
